

RAHUL KUMAR RAJAK

91-8969463558 — rajakrahul1999@gmail.com — GitHub — LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and MCA student with experience in data analysis, machine learning, Python programming, and business intelligence tools. Skilled in transforming raw data into actionable insights using Python, SQL, Pandas, NumPy, Power BI, and Excel. Strong analytical mindset with experience in developing data-driven solutions and dashboards.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Data Analysis: Pandas, NumPy, Seaborn, Matplotlib, Data Visualization,

Business Intelligence: Power BI, Excel, Dashboard Development, DAX

Machine Learning: Scikit-Learn, Model Evaluation, Data Preprocessing

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code

EDUCATION

Pondicherry University			Pondicherry
Master of Computer Applications (MCA)	2026	—	CGPA: 6.88
Magadh University			Bodhgaya, Bihar
Bachelor of Computer Applications (BCA)	2021	—	76%
S.S.Y. Inter College			Gaya, Bihar
Intermediate (BSEB)	2018	—	47.5%
High School Sarvoday Nagar			Gaya, Bihar
Matriculation (BSEB)	2016	—	45.5%

EXPERIENCE

National Institute of Electronics and Information Technology (NIELIT)	Ranchi, India
<i>Software Developer Intern</i>	Jan 2026 – Present

- Performed data analysis using Pandas and NumPy to identify trends and patterns.
- Applied Python programming and data structures to solve 50+ analytical problems.
- Built machine learning models with Scikit-Learn achieving 80%+ accuracy.
- Utilized SQL, Flask, Git, and data processing techniques for development tasks.

Puducherry Tourism Development Corporation	Puducherry, India
<i>Data Analyst Intern</i>	Feb 2026

- Developed data pipelines using Python and SQL to streamline data workflows.
- Improved data processing efficiency by 25%.
- Generated insights from large datasets to support executive decision-making.

PROJECTS

Sales Performance Dashboard

- Designed an interactive Power BI dashboard for end-to-end sales analytics.
- Created custom KPIs, slicers, filters, and dynamic DAX measures.
- Analyzed revenue growth, customer buying trends, and overall business performance.

IPL Winner Prediction System

- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) on IPL datasets.
- Built machine learning classification models for accurate match outcome prediction.
- Visualized prediction results and model performance metrics using Python libraries.

CERTIFICATIONS

- Numpy, Pandas, Seaborn, Matplotlib, Power BI Certification – Infosys Springboard
- Python Programming Certification – GeeksforGeeks
- Full Stack Developer Bootcamp – GeeksforGeeks
